Investment policy

The investment objective of the FORTUNA Short Term Bond Fund CHF is to achieve as constant a return as possible while paying particular attention to the security of the capital invested. The fund aims to preserve nominal value plus a minimum return of 0.50% p.a. This investment goal is pursued using an "absolute return" approach. The average capital-weighted residual term of all bonds may not exceed three years. The residual term of individual bonds may not exceed five years. The fund is administered independently of any reference index.

Financial glossary

Securities number	The identification number applied in Switzerland to securities to facilitate their trading and transfer. This is known as the ISIN at the international level.
Benchmark	The identification number applied in Switzerland to securities to facilitate their trading and transfer. This is known as the ISIN at the international level. An index which serves as a basis for comparing the performance of an investment fund. The benchmark specifies a comparable/reference portfolio against which the performance of the portfolio in question can be evaluated. Benchmark returns do not contain cost components.
NAV	The net asset value (NAV) of a share is equal to the net fund assets divided by the number of outstanding shares.
Modified Duration	This is a measure of interest rate sensitivity. The modified duration indicates the percentage change in a bond's price when the market interest rate changes by 1%. The percentage change of the bond is calculated by multiplying the modified duration by the percentage change in the interest rate. It is the ratio used by investors to assess all pricing opportunities and risks at a glance.
Average remaining maturity	The bonds' average remaining life from the current date to maturity or early redemption, as the case may be. This figure indicates the term – shorter or longer – of the fund's investment.
Subscription commission	The commission charged by the issuing fund company to the investor on the purchase of fund units.
Overall remuneration	Calculable figure charged to the fund's assets arising from the fund's operations. This commission covers all expenses incurred in the purchasing, selling and safekeeping of securities as well as all sundry costs (for printing prospectuses and annual/semi-annual reports; auditing and publishing prices; fees charged by the supervisory authority; etc). The only costs not covered are those incurred in the purchasing and selling of securities through the fund manager.
TER	Total expense ratio (TER) is a standard ratio making funds more directly comparable and gives information on the annual fees and expenses associated with an investment fund on top of the issuing commission.
