To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
